POWER EQUIPMENT

Hyundai HY3600SEi

The Hyundai HY3600SEi is the largest petrol leisure generator in the Hyundai inverter generators range. For the size and output of the machine, it is still relatively portable, with heavy duty carry handles and sturdy in-built wheels. Weighing in at just 55kg, there isn't another generator on the market like this one. The HY3600SEi will easily provide power to top class RVs and motorhomes with more modern or often higher spec equipment installed.
